Subject: Refund summary

Kabir - monthly refunds by reason code and by agent. Who, how much, what for. My export sums to well over a crore a quarter which cannot be right and is exactly why I want someone else's eyes on it.

Files attached. Two things. The legacy Freshdesk rows store money the way Freshdesk stored money, and I believe Finance reconciles that on their side - I never changed it. Reason codes come from a dropdown; the first option in the list is GW-OTHER (Goodwill / Other) and agents are agents. The helpdesk's own report says refunds run around Rs 11 lakh a quarter, for what it's worth. Some tickets appear twice from the migration re-import.

Before you go after my agents: refunds went up because we told the frontline to stop arguing with customers in Q4. CSAT went up 0.4 in the same period. That was the deal we all signed off on.

Slight tangent. I did a spot check of twenty refund tickets last month and in a couple the customer also got a new unit sent out. Probably one-offs - the Returns Desk is very careful about this and it's them doing most of the refunds anyway. Mentioning it in case it's useful.

Fine. Rs 11 lakh a quarter versus my crore - one of us is reading the export wrong. Summary by reason code and agent, monthly, and I want the total to reconcile. Board pack is on the 24th.
